Mission Statement

To advance the independence, productivity and full citizenship of people affected by cerebral palsy and other disabilities. WE BELIEVE that all people with disabilities, including those with cerebral palsy, have fundamental rights to have equal opportunity to choose and participate in lifestyles that enable them to live in their own community, receive an education that prepares them for employment, and the opportunity to live and grow within their family and that our advocacy and service efforts must be truly family-centered rather than exclusively on the individual.
